TOUCH MONITORS

FROM CRYSTAL DISPLAY SYSTEMS

CDS are a specialist global supplier of innovative industrial LCD display and digital signage solutions. CDS have strengthened their growing positive reputation in the retail market sector with some major global clients choosing the CDS Halo range originally developed for the gaming sector.

LED FRAME FLAT MONITORS

LED Frame displays (the CDS Halo) is now an essential look grab attention. CDS have an ever expanding range with full bespoke capability. With sizes from a small 10" to a massive 55" we are able to meet most requirements.

LED FRAME CURVED MONITORS

To compliment the flat LED frame monitors CDS have a range of curve monitors. These are available with / without the LED frame effect and with / without PCAP touch. Both C and J curve options are available from 32" and the 23.6" is in development.

OPEN FRAME LEGACY MONITORS

CDS are able to offer simple open frame monitors for new designs, and bespoke solutions for legacy design support. We are also able to offer alternatives to ELO PCAP touch monitors. These are form, fit & function compatible alternatives.

Multiple sizes available

Available with PCAP touch

Controllable smart LED frame

Suitable for portrait and landscape

Industrial rugged design

Price competitive solutions

Up to 4K UHD resolution

Bespoke design options

Visit Crystal Display Systems "Display Corner"

What is the CDS Display Corner? During the Covid 19 period, initially no-one knew what was going to happen. However, as the time progressed it was clear that business had to continue.

The biggest change was the sensible working-from-home / social distancing strategy. At this point CDS started their Display Corner on YouTube.

The CDS Display Corner allowed new products to be shown to potential clients without a face to face meeting.

It worked so well, we continued creating these virtual demonstrations

These demonstrations are as natural as possible.

Although there is a small amount of editing to help the experience, the products are not enhanced, we don't use actors and the client will be seeing the actual real product, nothing superimposed and no AI. The aim is to where possible have a single shoot.

They may not be as slick as other product videos, but the intent is for the clients to have a true understanding and representation of the product as if it was a face to face meeting.

HIGH QUALITY 43" J-Curved Halo Touch Monitor from CDS

Tony is showing the LED edge lit FLAT halo monitors which adds real value to the end user's machine.

Depending on your application and specification of the system, the LED Halo are seamlessly integrated into the housing for system solutions to allow for a modern slick look.

CHECK OUT The 32inch C-Curved Halo Touch Monitor from CDS

See Meghan demonstrating a smaller Halo screen where the LED's are behind the glass rather than edge.

Although most new designs utilise the edge lit FLAT design, CDS still support the behind glass halo to give an LED frame effect

Take a Look at Some of Our Gaming Display Solutions We Offer!

Richard shows you some of the gaming display solutions CDS can offer

CDS originally entered the gaming market by developing alternatives to EOL and 'hard to get' touch monitors. This is still a growing business as legacy cabinets still need support and CDS are able to quickly develop direct alternatives
