

Nebula AI Touchscreen Computer for Healthcare Innovation

Nebula AI Android Touchscreen Computer

A sleek, all-in-one solution designed to:

- Streamline patient check-ins
- Simplify wayfinding through hospitals and clinics
- Enable seamless medical IoT integration

Stunning Display

- 10", 15.6" & 21.5" Full HD
- 400 cd/m² brightness
- Anti-glare glass
- 10-point capacitive touch

Powerful Performance

- Quad-core Cortex-A72/A53 CPU
- 4GB RAM
- 32GB eMMC storage
- Android 15

Advance Connectivity

- WiFi 6
- Bluetooth 5.0
- PoE Ethernet
- Versatile I/O ports (USB 3.0, Type-C, UART, GPIO)

AI Capabilities

- 5MP camera
- noise-canceling microphones
- enable facial recognition, voice processing
- real-time analytics

Elevate Patient Care & Efficiency

- ✓ **Patient Check-In Kiosk:** AI streamlines registration by guiding patients, auto-verifying insurance, and triaging symptoms via smart questionnaires.
- ✓ **Interactive Bedside Monitor:** AI personalizes patient interfaces, predicts care needs, and suggests educational content.
- ✓ **Digital Whiteboard:** AI prioritizes and updates patient care tasks, staff assignments, and alerts based on real-time data.
- ✓ **Digital Door Sign:** AI dynamically adjusts room status or precautions using patient data and infection risk predictions.
- ✓ **Telemedicine Interface:** AI enhances virtual consultations with real-time transcription, symptom analysis, and diagnostic support.
