| **SV-270-001-4W (4 way)**

Protect Your Sensitive Information

Get enhanced visual comfort and seamless connectivity with the SoloVUE 23.8" FHD & 27" QHD Desktop Monitors

Built-In Privacy Protection

Keep your information secure at all times. The integrated privacy filter ensures your screen remains visible only to you, effectively blocking side views and minimizing the risk of visual data breaches—ideal for open offices, shared workspaces, or public environments.

Enhanced Visual Clarity for You

Enjoy clear, crisp visuals directly in front of the screen without sacrificing image quality. Unlike external privacy films, the built-in filter is precision-engineered to maintain color accuracy, brightness, and contrast, ensuring your work looks its best while staying private.

Smart, Seamless Design

No more attaching or removing external filters. The built-in privacy layer is seamlessly integrated into the display, providing discreet protection without added bulk or hassle. It's always active and ready to safeguard your data the moment you power on.

Optimized for Productivity

Stay focused without distractions. With a glare-reducing, matt screen finish and adaptive brightness technology, these monitors minimise eye strain while helping you work comfortably and securely throughout the day.

Business-Ready Security Solution

Designed for professionals who handle sensitive data, these monitors support compliance with privacy and data protection standards across industries. Whether in healthcare, finance, legal government or other industries, your screen content remains confidential from unauthorized viewing angles.

Viewing Angle / Privacy Angle

CDS privacy monitors are engineered with precision viewing-angle control to protect on-screen data from prying eyes. Our advanced optical design ensures the screen remains crystal-clear for the user while appearing dark or obscured from side angles — ideal for secure work environments, open offices, and customer-facing spaces.

Brightness, Colour, and Clarity Optimisation

Unlike traditional privacy screens that compromise brightness and contrast, CDS displays are engineered to deliver vivid colours and optimal luminance while maintaining full privacy protection. Experience consistent image quality with no visual distortion or dullness.

Why buy CDS SoloVUE Monitors?

- **Reduce cost and improve security** - one reliable, high-quality purchase.
- **Enhanced Data Security** - This prevents onlookers from viewing confidential or sensitive information, making it ideal for offices, reception desks, medical environments, and financial settings.
- **Integrated Design Convenience and aesthetics** - Built directly into the monitor, eliminating the need for separate clip-on or adhesive filters that can fall off, scratch, or reduce clarity.

- **Durable and Lightweight Construction** - The plastic housing offers impact resistance and reduced weight compared with glass-fronted alternatives, improving portability and safety.
- **Reduced Glare and Eye Strain** - Integrated privacy filters include an anti-glare coating, improving comfort in bright or open environments.
- **Cost and Maintenance Efficiency** - It is a One-time investment that does not require replacing or cleaning external filters; it also reduces downtime and accessory management.

- **Professional Aesthetic** - Sleek, factory-fitted design with no visible attachments or clips, maintaining a clean, corporate appearance.
- **Customisation Options** - Available in various screen sizes, and input options (terms & conditions may apply).
- **No ongoing costs to protect privacy!**
