What's new...

Our Portrait Digital Poster range has been replaced with the strikingly elegant new LED Digital Advertising Display and Slimline Freestanding Digital Poster ranges. In addition to these we have also added two 55" models to our LCD Video Wall Displays and a full HD Standalone Media Player to our Digital Signage Player range.

Digital Signage Made Easy.

Our recently upgraded, increasingly user friendly, Digital Signage Solutions come in a variety of styles, sizes, orientations and have various features and functions to suit any application. However there are key features that all of our displays share. All of our displays are designed for 24/7 public usage and have Commercial LCD panels to ensure that the sharp colours don't fade over time, as they would with other LCD panels found in TVs and PC monitors. Our displays are also unbranded and do not have any easily accessible buttons or controls. As we manufacture the screens any pre production modifications can be made. They all have a number of inputs - both for video signals and storage devices, as well as having an eco-friendly power timer.

Our Digital Advertising Displays and Freestanding Digital Poster ranges have a simple plug and play system to manually update content. Additionally they can be wirelessly updated and networked using our Network Media Player that supports up to the minute RSS feeds.

Included free with the plug and play models is a powerful and easy to use piece of scheduling software which enhances the capabilities of the displays by allowing a user to create playlists for different times and occasions. For example if the display were to be used as a digital menu board, it could show the breakfast menu in the morning and lunch menu in the afternoon.

The Simplicity of Plug and Play.

Our products use a straightforward plug and play system. Simply load the media files, or playlist, in the order you want them to be displayed onto a USB stick. Then insert the USB drive into the screen, wait for the data to load, remove the USB drive and your images, videos and music will be played on a continuous loop.

Digital Signage Displays Continue to Grow in Popularity.

Digital Signage is establishing itself as the preferred method of advertising, providing internal communication and public messaging for a host of business sectors. They are ideal for retail locations, where the use of Digital Signage has almost quadrupled in the last few years. Retail environments like supermarkets, department stores, drug stores, show rooms and shopping centres are just a few of the popular settings for this engaging medium. Other possible venues include banks, bars, cafés, gyms, art galleries, salons, train/bus stations, travel agents, hospitals, schools, museums, exhibition displays, cinemas and conference halls.

Falling equipment costs, increased awareness and a realisation of the competitive advantage that can be gained by using Digital Signage are all factors that are allowing this dynamic medium to become more accessible.

Super Slim Profile

- Introducing the new ranges of HD Slimline Displays; with their built in HD media player they require no additional hardware such as PCs, DVD players, excess cables or software. Simply load your media onto a USB stick, then plug and play
- Their buttonless tempered glass frontage, rounded corners, super slim profile and aluminium frame all add to their eye-catching tablet like aesthetics
- They support scrolling text to compliment your content and get your message across
- They are fitted with commercial grade panels giving them a wide viewing angle, improved colour, contrast and brightness as well as the ability to be used 24 hours a day. With an eco-friendly power timer you can be assured of their green credentials and low operating costs
- Also included is simple and intuitive scheduling software which allows you to schedule different media and scrolling text to play at different times of the day
- Featuring HDMI and VGA inputs; allowing you to connect external devices such as a PC or external media player (these can be hidden internally in the freestanding displays)
- A free wall mount is also included with the LED Digital Advertising Displays allowing you to mount your display in both landscape or portrait orientations

Portrait or
Landscape

- Sleek, elegant tempered glass styling, the ability to be in constant use and a wide viewing angle means that they offer many advantages over domestic LCD screens
- Brighter than home TVs and have no buttons or controls on show. Built in media player allows for a simple plug and play method for content update
- Lockable compartment for mass storage devices used to update the display
- A free landscape wall mount comes as standard
- Simple scheduling software included to allow the user to set up playlists with images, videos and music to play at different periods during the day
- Suggested Applications: retail locations like supermarkets, department stores, pharmacies, show rooms and shopping centres as well as banks, bars, cafés, gyms, train/bus stations, travel agents, hospitals, schools, museums, exhibition displays, cinemas and conference halls

Freestanding Digital Posters

- Dynamic, simple to use and achieve a powerful impact, the High Definition Freestanding Digital Posters are ideal for grabbing the attention of your target audience
- As well as being portable, they also have the ability to be in constant use and a wide viewing angle. They have a sleek, elegant tempered glass styling and have no buttons or controls on show
- A built in media player allows for a simple plug and play method for updating content making them extremely user friendly
- They also have a lockable compartment with an internal power supply and enough space to conceal an external media player or small PC that can be used to directly display content
- Simple scheduling software included to allow the user to set up playlists with images, videos and music to play at different periods during the day
- The 40" Freestanding Digital Poster has an integrated literature stand, providing a great balance between "the now" and "the later" with an eye-catching and immediate visual impact combined with printed material that can be taken away
- Suggested Applications: retail locations like department stores, show rooms and shopping centres as well as banks, gyms, train/bus stations, travel agents, hospitals, museums, exhibition displays, cinemas and conference halls, hotel lobbies and reception areas

Multiple Inputs

Infrared Multi Touch Screen

Windows OS Compatible

Eco-Friendly Power Timer

Easy USB to PC Setup

Portrait or Landscape

- The range includes wall mountable units that can be used in both landscape and portrait modes and both landscape and portrait freestanding models
- Ideal for public locations as a finger, gloved hand, pen or stylus can be used as a pointer; activating the screen requires no pressure so will incur less damage over time
- Unlike capacitive touch screens, infrared touch screens do not require any glass patterning. Not only does this improve optical clarity, it also increases its durability.
- Suggested Applications: retail locations like supermarkets, department stores, drug stores, show rooms and shopping centres as well as banks, bars, cafés, gyms, train/bus stations, travel agents, hospitals, schools, museums, exhibition displays, cinemas, conference halls hotel lobbies and reception areas

LCD Video Wall Displays

- Full High Definition Samsung DID panel; not only will these displays have a long life but are also highly reliable. The high brightness models ensure a sharp and distinct display even in sunshine
- The built in eco-friendly power timer allows for a reduced power usage in those hours that the displays are not required
- Smart temperature control system allows them to be in constant use
- Total bezel size as narrow as 5.7mm
- The LED backlit models are even more economical and slim as well as producing a much greater contrast ratio
- Powerful interface supporting Composite Video, VGA, DVI, RGB/HV and YPbPr
- These displays can be used individually or as part of a tiled video wall. As a video wall, the units can tile the video signal automatically; meaning the video wall can have any configuration without any additional hardware

Outdoor Digital Posters

- Suitable for the harshest of outdoor conditions - designed with a robust outer casing to give protection from both the elements and the public
- Not only are the displays able to withstand hot and cold surroundings but they are able to manage the internal conditions; maximising LCD panel life. Built in air-conditioning can now be tailored to allow the display to work at an optimal level in any climate
- The outer casing has an IP65 rating which means it keeps out all airborne swarf, dust and other particles as well as being protected from any wet weather conditions; broadening the range of possible environments
- The brightness of these displays is around 3 times brighter than a standard home TV to allow easy readability in direct sunlight
- Some examples of suitable environments for this range include train/bus stations, town centres, concert halls, theatres, sporting arenas and outdoor leisure centres

Digital Signage Players

PPHD – High Definition Standalone Digital Signage Player

- Convert existing displays such as TVs or PC monitors into digital signage displays. It has an internal SD memory card which can be updated directly or via the USB port
- Using a simple plug and play method you can load your media files (images, videos and music) onto a USB stick, plug it into the media player and your content will be loaded onto the internal memory card and will display in whatever order you like
- As well as having a full HD output the High Definition Media Player also comes with additional scheduling software. This easy-to-use application allows you to define duration times and the order of each media file as well as allowing you to display scrolling text under your content

PP02 - Standalone Digital Signage Player

- Substitute a digital signage display with existing in home displays such as TVs or PC monitors
- It allows any display with a VGA input to display images, video and music
- As well as this the PP02 has the function of supporting scrolling text
- It accepts multiple types of memory card including CF, SD and USB mass storage devices

PPNET - Network Digital Signage Player

- Designed to wirelessly network up to 3000 digital signage displays for quick and easy updates. There are no expensive server or subscription costs – your PC acts as server
- Compatible with any LCD, plasma or projected display and accepts content in all major video, audio, animation and graphic formats
- Simply import your content, choose a screen layout and enter the times you want the content to appear. PPNET lets you add and update your own messaging information online at any time and can display up to the minute RSS feeds
- The Network Digital Signage Player is based on a Linux operating system which is known for its stability and resilience against viruses

High Definition Media Player

Unit Size (LxWxD mm)	214x156x36
Update Method	SD/USB
Memory Size	4GB (included)
Media Formats	Video: MP4, AVI, VOB (Codecs: DIVX, XVID, MPG, MPEG1, MPEG2, MPEG3, MPEG4), Image: JPEG, Audio: MP3
Output	HDMI, AV Composite (CVBS), Audio (Left/Right)

Standalone Media Player

Unit Size (LxWxD mm)	160x130x30
Card Type	CF/SD/USB
Memory Size	4GB (included)
Media Formats	MPEG1, MPEG2, MP3, JPEG, VOB, AVI, DIVX, XVID
Audio	2W,8Ω
Output	VGA, CVBS, Audio (Left/Right)

Network Media Player

Unit Size (LxWxD mm)	211x126x34
Weight (g)	600
Storage	2GB, Optional with bigger capacity up to 40GB
Power Supply	12V DC input
Power Consumption	Approx 5W
Core Processor	Sigma Designs C Single chip digital media processor (Embedded 32-bit RISC CPU)
Video Output	DVI/S-Video/CVBS
Media Formats	MPEG1, MPEG2, MPEG4, AVI, DIVX, XVID, WMV, JPEG, VOB
Audio Output	Audio Socket (3.5mm)
Network Connection	10/100BaseT(RJ45), LAN, WIFI
Accessories	DC Adapter, Power Cord, DVI Cable, User Manual
