RI Cloud Permission

Definitions

- Lockdown: configuring the Android devices used for work into a business-only mode devices are locked down to business applications and the end-user can make use of the device in a restricted environment.
- Apk: Android Package is the package file format used by the Android operating system, and a number of other Android-based operating systems for distribution and installation of mobile apps, mobile games and middleware.
- ^a Firmware: a tangible electronic component with embedded software instructions, which are used to tell an electronic device how to operate.
- Plugins: a software component that adds a specific feature to an existing computer program,
 which enables customization.

Overview

This document will detail instructions and installation steps for setting up Star Control and TAURI Cloud. This will include the setup instructions for the following:

- Account Setup
 - a. Registering a Star Control account
 - b. Logging into www.thestarcontrol.com
- 2 Connecting Tablet to Star Control
- Lockdown Tablet Using StarOS
- Managing Devices
- Managing Libraries

Account Setup

Creating an Account

Create an account by going to www.thestarcontrol.com, enter your email address, password and a link will send it to your email for confirmation.

Set your Devices Up

After connecting the device to Star Control Platform, you need to manually reboot the device.

Set permission

- StarOS
 - Lockdown Lockdown device(s) for display
 - Regular actions
 - Set regular schedule to turn on, turn off or restart device(s)
- Manage devices
 - Device list
 Add, remove and edit all connected device(s)
 - Install/uninstall
 - Install application into device, or uninstall from device
 - Reboot device
 Restart device(s)
 - Screen captures
 - Capture current device(s) screen activity & screen captures records

 Device settings
 - Adjust device volume and change password
 - Log records
 - Fetch & view device logs
 - Save Cancel

Set up accounts

To activate your account, open the link sent to the registered email. If there are any duplicated accounts/email addresses, it would show that it has been registered and you need to register an email that has not been used before.

To edit profile information, head into the manage account on the navigation bar and select on the pencil icon Set up your account information by uploading your profile picture, setting your display name, phone number, and department. You may change your email address and delete your account in the account settings

Manage Accounts

Tap on 🗊 to set permissions for each account. You may assign the user rights to each device, as well as assign which device each person would control. A few options are:

- Lockdown devices
- Schedule actions
- Add remove edit connected devices
- Install/uninstall applications
- Reboot device(s)
- Screen captures
- Adjust device volume
- Change password

We would suggest that you map out the structure of your organization / project before doing this.

Lockdown Tablet via Star Control

 Tap "Lockdown" from the side bar. Select device(s) to control.

2. Select ⁽²⁾ button on the top right corner.

3. Select a mode for your device.

 For "Media player" and "Multiple apps"mode. You may need to upload video in "Library" or install apk in device before select this mode.

5. Select at the top right corner to apply settings.

		Launch	ø
Launching	Status		
Media player mode	Online		
Media player mode	Online		

Schedule Actions via Star Control

 Tap "Schedule actions" from the side bar. Select a device to schedule reboot or schedule turn on/off.

2. Set schedule for auto reboot TAURI.

 You may also select "Add new schedule" to schedule multiple reboot schedules.

name Model	All groups	 ✓ OS Version 	
ice name	Madal	Crain	or Version
nany - NEB215	Schedule reboot		0115180549

Plugins: TAURI Cloud Dashboard

 The dashboard summarizes the temperature check results of staff, guests and the two combined. There is a visual graph where you can see the results over a chosen period of time. Any announcements are displayed at the top.

 Change the information shown on the graph by adjusting the dates located on the top right corner of the dashboard.

Plugins: TAURI Cloud Historical Data

- Tap on "Historical data" from the sidebar. Find a summary of records of the entire TAURI database:
 - a. Visits total/abnormal
 - b. Staff total/abnormal
 - c. Guest total/abnormal
- 2. You may export the data by selecting the Export report button.

Plugins: TAURI Cloud General Settings

Change the general settings of each device by selecting a device and selecting ^{Change settings}:

- 1. Acceptable temperature range
- 2. Change to °C or °F
- 3. Temperature result message
- 4. Enable mask detection and custom message
- 5. Enable racial recognition
- 6. Change access pin

Plugins: TAURI Cloud Staff Profile

- 1. Select "Staff profile" from the sidebar. View all staff profiles created and make changes to existing profiles or create new ones. Staff profiles are used in the facial recognition process.
- 2. Select Newprofile . To create a profile:
 - a. Upload a photo (well lit, shows entire face, 400 x 400 resolution)
 - b. Staff number
 - c. Name
 - d. Department
 - e. RFID number, phone and email (optional)
- To edit existing profiles, select
- Select to sync staff data to device(s). Proceeding with this will overwrite current data by the new data, make sure to include old data in the sync if you want to retain it
- Select 1 to delete staff profiles.
