

DMC Company Presentation

DMC
Interface with Touch

About DMC

**-Touch screen manufacturer
established in 1973**

**-No.1 sales and production performance
in Japan**

-"At any time, stable supply first."

DMC started its business as a manufacturer of artwork material for PCB in 1973 and since establishment, we have keep growing in the field of industrial devices. We produced various semiconductor related products following the trend of the time and started manufacturing and distributing touch screen in 1991. Now we are expanding our business globally as a touch screen manufacturer.

We stably supply our products even from small lot to meet various technical demands and continue to support the development of industry.

- 1973 Established for manufacturing and distributing artwork tapes for PCB..
- 1987 Established Fukushima factory in Futaba gun, Fukushima prefecture.
- 1991 Started operating the integrated production line of touch screen in Fukushima factory.
- 1996 Established PT. DMC TEKNOLOGI INDONESIA in Indonesia.
- 1999 Established Shirakawa Factory in Shirakawa city, Fukushima prefecture.
- 2013 Fukushima head office was merged with Tokyo branch office and relocated to Minato-ku, Tokyo.
- 2019 Expand Second Factory and integrate old Shirakawa Factory. Established a sales branch in Italy (DMC Italy)
- 2021 Established a subsidiary, "DMC Iwaki Co., Ltd."
Took over the touch screen manufacturing department from NKK SWITCHES CO., LTD. and opened the "Iwaki Factory" in Iwaki city.
- 2022 Established a sales branch in Taipei (DMC Taiwan)
- 2023 **Merged with Seedsware Corporation and launched a new brand, "DUSH"**

IWAKI Factory

- Number of employees :50 (as of Jan, 2023)
- Main product: Resistive touch screen
- Production Volume (month) : about 20k

INDONESIA Factory

- Number of Employees: 685 (as of Jan2023)
- Main product : Resistive touch screen (including some part of Capacitive type)
- Direct shipment to overseas
- Compliant with Japanese standard
- Production Volume(month) : about 220k

SHIRAKAWA Factory

- Number of employees :119 (as of Jan, 2023)
- Main product: Projected Capacitive touch screen
- Production Volume (month) : about 10K

DMC's FEATURE

WIDE RANGE OF PRODUCT LINEUP

MARKET SHARE

1 DMC is the only company in Japan that specializes in touch screens for the industrial use. Especially in the FA market, we have more than 60% of the market share.

2 DMC has more than 160 standard product of touch screen. Easy to find fitting PCAP/Resistive touch screen for the products.
Wide range of size supported (up to 32inch)

CUSTOMIZATION

3 DMC has supplied Japanese quality products to domestic and overseas customer more than 30 years. We are able to meet customization request from each customer.
(Over 3,000 experiences of customized products)

SUPPLY SYSTEM

4 DMC offers long period supply to meet the request for long-life product.

TOTAL SUPPORT

5 As we produce sensor and controller, we can support with both hardware and software approach.

ISO CERTIFICATION

■ JAPAN ISO Certification Symbol

Quality

Environment

■ Republic of Indonesia ISO certification symbol

DMC has been awarded the highest gold rating for overall sustainability evaluation (CSR) by Eco Vadis in 2020.

※CSR: Corporate Social Responsibility

DMC Co., Ltd. has started to take this Eco Vadis assessment for overall sustainability from 2013 . We received Bronze rating in 2013, and Silver rating from 2015 to 2017. and gold rating since 2018

Eco Vadis assesses suppliers based in 21 standards over 4 themes. About 75,000 global companies in 160 countries and 200 industries adopt this evaluating system, and companies in top 5% rating are evaluated as “Gold”.

2022
SALES RESULTS

2022 Total Sales Results : \$43.64M (USD 1=JPY 130)

Advantage and disadvantage by type

	Advantage	Disadvantage
Resistive	<ul style="list-style-type: none">• Robustness vs external noises• Need input force, less malfunction• Various input material could be used (finger, gloves, stylus pen, any.....)• Cost advantage and easy mechanism design	<ul style="list-style-type: none">• Input force quite heavy ⇒ DMC is able to offer the new Light Touch Technology (LST series)• Generally a Single Touch operation is allowed ⇒ DMC is able to offer new Light Multi-Touch Technology (MTR-G series)• Less transparency and durability compared to capacitive type
Pro-Cap	<ul style="list-style-type: none">• Light touch operability• Multi-touch and gesture operation are possible• High durability• Beautiful screen appearance• Flat design could be realized in operation• Suitable for outdoor use	<ul style="list-style-type: none">• Easily affected by external noises• Limited input material (can be operated only by fingers, stylus pen or thin gloves)• More expensive than resistive

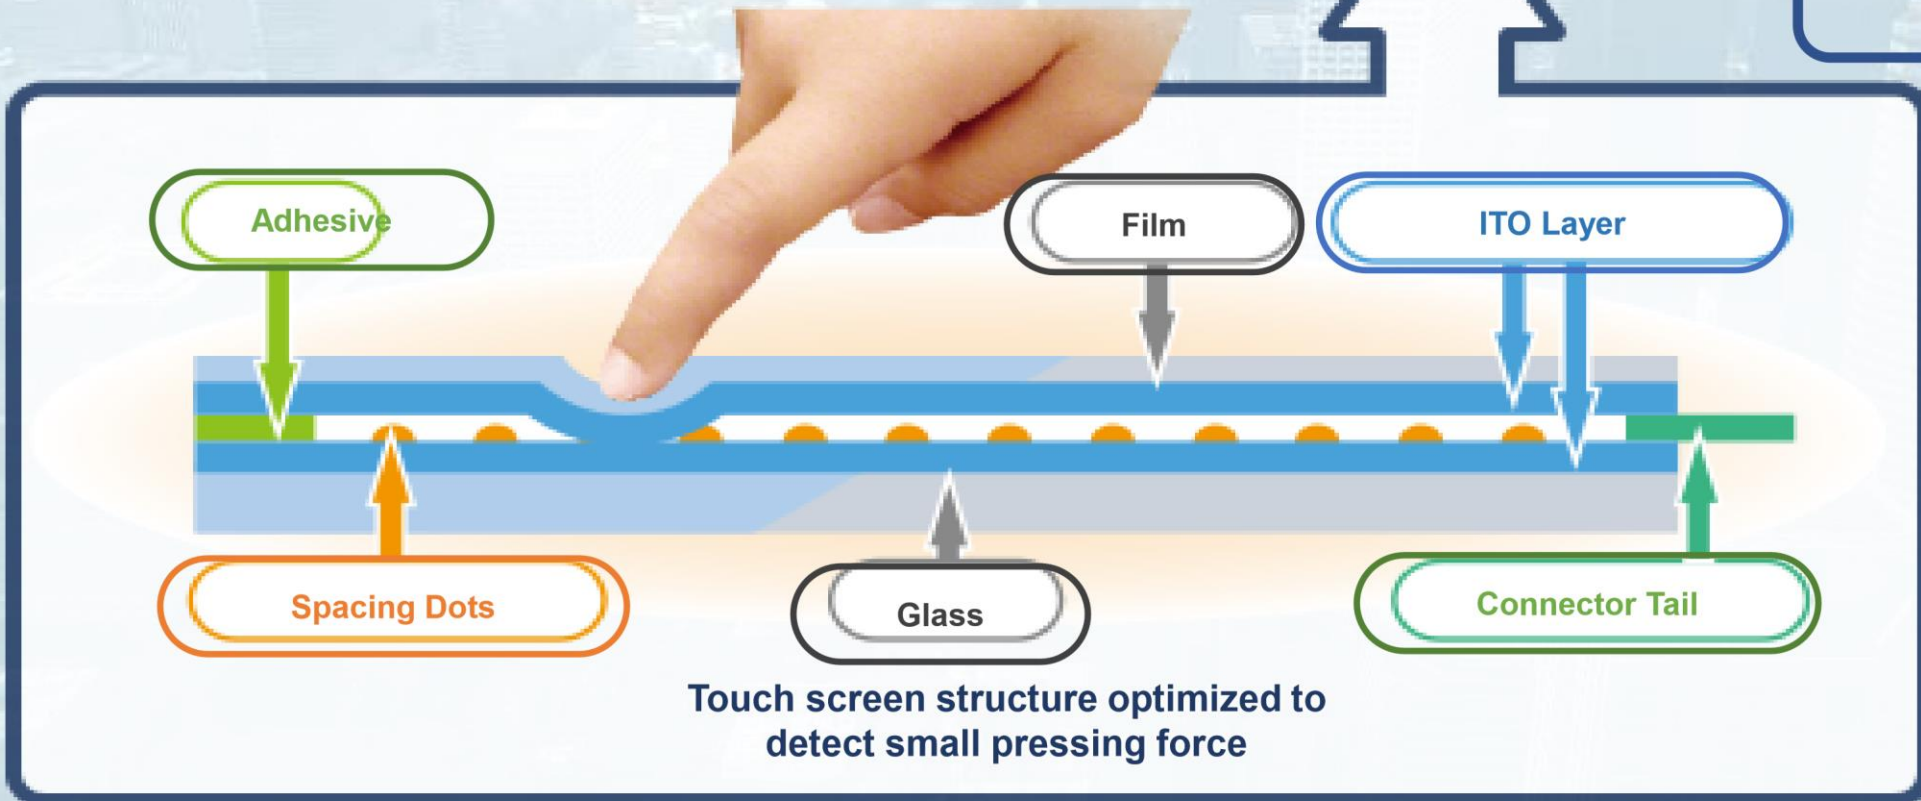

Resistive Light Touch Screen Sensor

LST MTR-G series

Resistive Light Touch Technology to Aim the PCAP Feeling

LST, MTR-G series

Development

Background

Conventional Needs

Reliable operability to prevent touch error / High durability for severe usage environment.

Shifts in Needs

Smartphone-like light touch operability / Gesture operations such as flick, pinch and rotation.

Simple Function

Highly compatible with traditional resistive sensor / Simple functions for easy operation

Advanced Function

Interlock function to prevent operation mistake / Smartphone-like gesture operation

Single-touch

LST Series

Single-touch input
Compatible with a normal 4W resistive controller
Light-touch

Multi-touch

MTR -MTR-G Series

Multi-touch input
Gesture input
Dedicated controller
Light touch

LST: Gesture Operation

with the new Controller TSC -52 /U
and TSC -52 /U -F & IC TSC -52 /IC

MTR -G: Gesture Operation and Multi Touch Input

1 Prevent operation mistakes with two-point touch
Multi Touch

2 Zooming in/out images with dual fingers
Gesture

3 Scrolling and turning pages by flick operation
Gesture

4 Rotating with turn operation
Gesture

LST, MTR-G features and options

Simple & Easy

Easy to install due to compatibility with a normal 4W Controller

Variation

Wide range of size lineup
LST 4.3 – 21.5inW
MTR-G 5.7 – 21.5inW

Overlay Film

PCAP-like Full Flat Surface

Smooth

Smartphone-like smooth operability

Protection Film

Protect the Surface of the Sensor from Scratch, Stain

Note: Operating temperature for TSC-50/IC “-40 ~ 105 °C (no condensation)

PCAP Touch

Screen Sensor Glass/Glass

DUS-A/DUS-LA series

DUS -A/DUS -LA features

Glass/Glass: Robustness & Transparency

1 Electrode patterning is not visible.

2 Narrow Frame Design for easier casing design.

4 Glass / Glass structure for environment resistance

3 Enhance the noise-filtering function with DMC's latest controller.

5 Wide temperature range support from -40 to 80°C

DUS-A: Without cover glass
DUS-LA: With cover glass

DUS-LA series

DUS - A series with standard
Cover Glass

No MOQ & Development cost

Since it can be selected from the standard lineup that is always in stock, it is possible to realize more freedom of choice at low cost without spending time.

- Orderable from 1 piece
- Wide variety of standard models from 7 to 21.5inch
- Bonding by OCA cover-glass onto standard touch sensor
- Stylish
- Flat surface design with low cost
- Short delivery term
- Additional customization is possible

Glass Specifications

- Black boarder printing
- Chemically strengthened
- Several thickness available (1.1mm and 1.8mm are currently available)

PCAP Touch

Screen Sensor Glass/Glass

DUS-LD series
Directly - printed on Glass

DUS -LD features

Glass/Glass
Directly-printed On Glass (DOG) Structure

- Sensor Glass + Sensor/Cover Glass
- Thinner and lighter than G/G/G structure
- Cost advantage over G/G/G structure
- 15.6w and 21.5w are in lineup

Directly-printed On Glass(DOG) Structure

G/G/G Structure (DUS-LA)

DOG vs G/G/G			
Item		G/G/G	DOG
TTL Thickness		4.3mm	2.5mm
Weight	15.6w	880g	570g
	21.5w	1,640g	994h

PCAP Touch

Screen Sensor Glass/Glass

DUS-N series

Narrow - edge

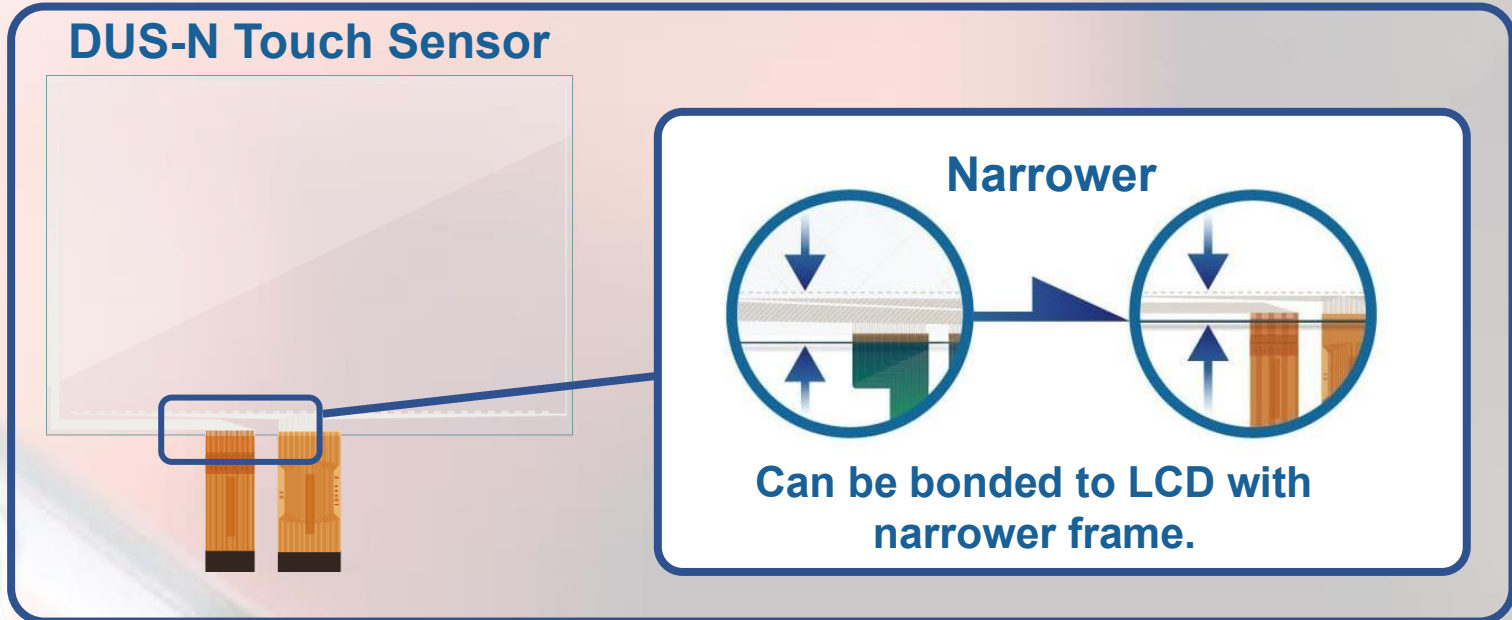

Narrow

DUS -N features

Glass/Glass Narrow-edge PCPA Sensor

- Narrow-edge and more compact than DUS-A series
- Easier to embed to monitors
- Lineup: 7W ~ 21.5W

Dimensional Comparison with DUS-A

Product No.	Size	Outline	Outline Difference (DUS-N vs DUS-A)	View Area	Active Area
DUS-N070A060A	7.0w	166x108	-2.8 x -3.4	155.7x94.35	152.4x91.44

DUS-A215B060A		495.8x293.6		479.9x271.3	

PCAP Touch Screen Sensor Glass/Glass

DFS series
For EETI Controllers

DFS Series features

Glass/Glass: Robustness & Transparency

Capacitive Touch Screen for
EETI Controllers

Designed to match with touch controllers that have world-wide popularity among industrial fields.

2 Thin Glass/Glass structure

DFS series is ideal for industrial applications. With its thin Glass/Glass structure, it is highly durable even in a harsh environment. 15" and larger sizes adopt thinner glass to lighten its weight.

3 Abundant choices of standard lineup

9 standard models from 8.4" to 21.5" W available without any development cost.

4 Customizations

Various customizations supported by our professional engineers, such as panel sizes, FPC modifications, covering glass addition, surface finishing, and round chamfering.

DFS series line -up

Compatible EETI Controllers' part numbers:

- 8.4"- 15" EXC84H4254STAG
- 15.6"- 21.5" EXC84H5680STAG

Size (inch)	For EETI	Note
8.4"	DFS-084A060A-E	
10.1" w	DFS-101WA060A-E	
10.4"	DFS-104A60A-E	
12.1"	DFS-121A060A-E	
12.1" w	DFS-121WA060A-E	
15"	DFS-150A060A-E	
15.6" w	DFS-156WA120A-E	Thin glass
18.5" w	DFS-185WA120A-E	
21.5" w	DFS-215WA120A-E	

PCAP Touch

Screen Sensor Film/Film

DUS-XF/DUS-F series

DUS -XF/DUS -F features

Film/Film: Light & Thin Solution

1

Electrode patterning is not visible.
Can be shipped with and without cover glass

2

Narrow Frame Design for easier casing design.

3

Enhance the noise-filtering function with DMC's latest controller.

4

Film / Film structure for light and thin solution

DUS-XF: Without cover glass
DUS-F: With cover glass

DUS -F series

DUS -XF series with standard
Cover Glass

No MOQ & not development cost

Since it can be selected from the standard lineup that is always in stock, it is possible to realize more freedom of choice at low cost without spending time.

- Orderable from 1 piece
- Wide variety of standard models from 7 to 21.5inch
- Bonding by OCA cover-glass onto standard touch sensor

Digital Printing on PCAP Cover Glass

Inkjet Printing

Inkjet printing

Features 1 of 2

What is Inkjet printing?

Ink-jet printing is a printing method in which ink is sprayed onto glass. It is capable of printing high definition expressions and complex colors such as gradation, which are difficult to achieve with screen printing, and thus can produce designs with added value.

Creating originality and a sense of luxury

Generally, touch monitor interfaces are monochromatic black or gray, but by using ink-jet printing to create carbon patterns or wood grain patterns, it is possible to create a sense of luxury and originality.

DUSx200 series

Development

History

Automation of adjustment function
DUSx200
Enhance adjustability

The latest model with further performance enhancement such as automatic switching of FW parameters and noise avoiding function. Extend the possibility of capacitive touch screen such as hi-speed response, high resistance for noise, and 20-point touch, by processing capacity improved 2-3 times compared previous model, DUSx100 series.

DUSx200
Enhanced noise-canceling function
High CPU performance (speed, storage capacity) (over 20 point touch and larger size over 65")

Developed performance
DUSx100
Acquired expanded function

Functions were expanded to respond to market request for various application with capacitive touch screen. Corresponding to thick glass, stylus pen, gloves and water detection. In addition, this series could be used for the large sizes over 40".

DUSx100
Uniquely developed AFE
High sensitivity (thick glass)
High processing speed (water detection, stylus pen, larger sizes over 40")

Touch screen and controller
DUSx000
Integrated support

Uniquely developed capacitive touch screen controller by DMC. Integrated support from both aspects of hardware and software was realized by log analysis and FW adjustment.

DUSx000
Unique scanning method
Analysis support

2012

2014

2016

2018

2019

DUSx200 series New Functions

ADJUSTABILITY

Improved adjustability !

Adjustability is improved by auto-calibration and automatic switching function of firmware parameters. Different parameters are saved in FW and switch them automatically according to input methods such as finger, stylus pen, or gloves.

PERFORMANCE

Improved response speed and noise resistance!

High response speed is achieved with high CPU performance. Noise-cancelling function is to detect power-supply noise and avoid it automatically.

EXPANSION

Large-sized displays and thick cover glass supported to expand applications!

Larger touch screen is supported with 10-point touch. 10 mm thick cover glass can be used due to improved sensitivity.(about 2.5 times compared to DUSx000 and over 1.5 times compared to DUSx100 series)

* Signage, Arcade game, Outdoor use, etc.

Easy Builder

Auto Calibration Software for PCAP
DMC Sensors

Trouble caused by environmental noise after installation

- The touch screen does not respond well.
- False input without touching the surface.
- Touch point drift

Easy Builder

Current

PCAP is sensitive to ambient noise and may require adjustment of the firmware to suit the installation environment.

Easy Builder is a software tool that allows you to easily adjust the firmware of the touch controller based on the environment of the installation.

Easy Adjustment by Yourself

Significantly reduces time to solve problem and contributes to cost savings

DMC engineer adjusts the firmware on-site.

Need to adjust the schedule with DMC engineer
Additional time and expense incurred if it is outside of Japan
Approval procedures are needed if the site is closed for outsiders

Easy Builder Functions

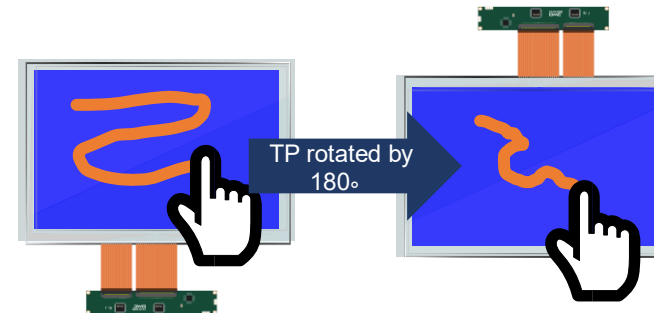

Sensitivity Adjustment

Easy Builder automatically adjusts sensitivity according to thickness of a cover glass.

Coordinate Adjustment

Easy Builder automatically adjusts coordinate output according to TP direction.

Noise Filter Adjustment

Easy Builder can increase noise filters to improve touch operation under a noise environment.

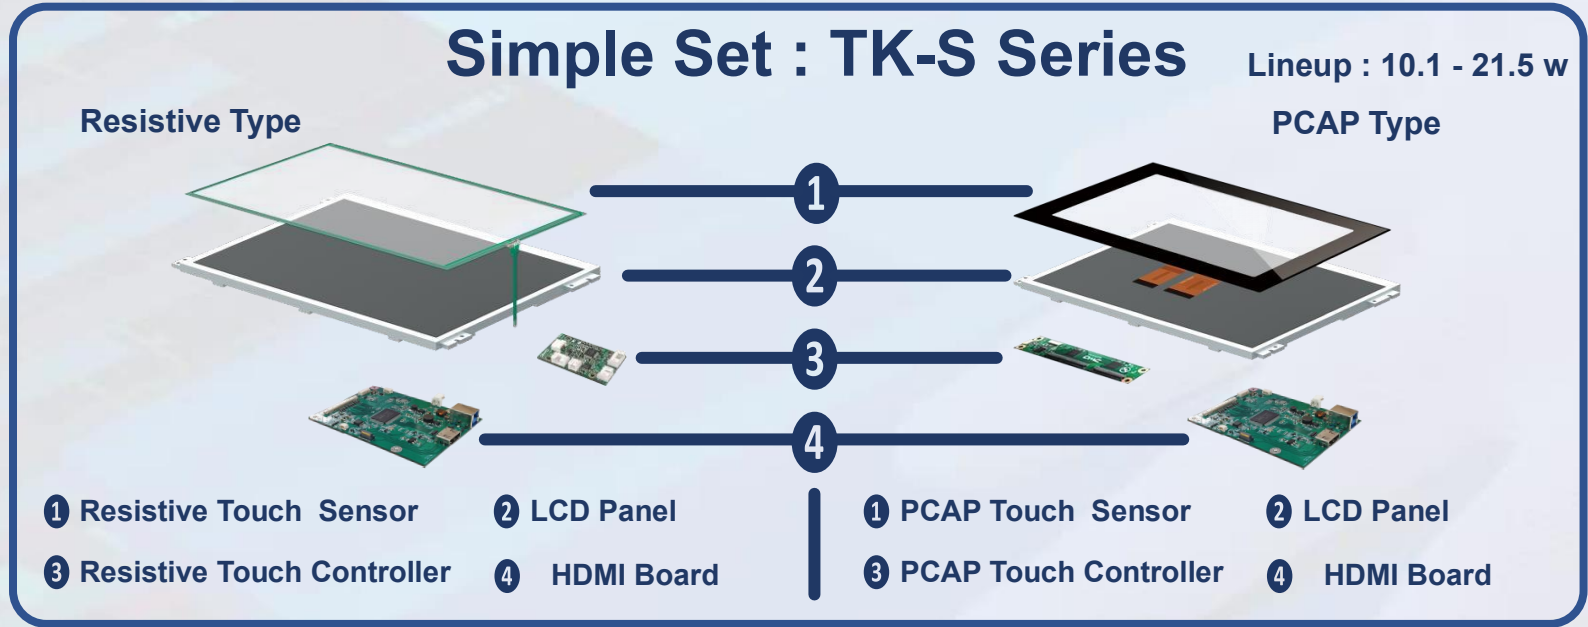

LCD Module with Touch Sensor

TK series

TK-Series features

- Open frame LCD module with touch sensor suitable for embedded applications.
- PCAP and resistive models in lineup
- Simple Set
 - Touch sensor and LCD only
 - HDMI image board available
- Basic Set
 - Touch sensor, LCD, HDMI board, and metal chassis
- DMC can also bond the touch sensor on an LCD customers pick other than the standard lineup.

Stylish Touch Monitor

TM Series

Stylish Touch Monitor features

1

Its slim and simple design makes the monitor stylish and fit wide range of applications.

2

You may choose either capacitive or resistive models according to applications.

PCAP

- Multi-touch
- Rugged
- Clear Visibility

Light-touch Resistive

- Gesture operation
- Safety
- Reliability

3

Back of the monitor can be rotated so that it is easy to change the orientations. The monitor can be used either in horizontal or vertical orientations due to its wide viewing angles in 4 directions.

Viewing angle: 170° (vertical & horizontal)

TM Series Lineup

Product No.	External Dimension(mm)	Size (in)	Resolution	Viewing Angle(°) (U/D/L/R)	Luminance (cd/m2)	Display Interface	USB Interface		Touch Sensor	Number of touch point	Operating Temperature (°C)	Operating Humidity(%RH)	Rated Voltage(V)
							Upstream	Downstream					
TMG-156FH01-01	245(W)x390(H)x48(D)	15.6	FullHD	85/85/85/85	390	HDMI (HDCP not supported)	USB3.0 (type-B)	None	PCAP	5	0 - 40	10 -80 (No condensation, wet-bulb temperature 39°C or lower)	DC12
TMH-156FH01-01									Resistive	1 (multi-touch gesture possible)			
TMG-215FH01-01	325(W)x527(H)x60(D)	21.5	FullHD	89/89/89/89	350	HDMI (HDCP not supported)	USB3.0 (type-B)	None	PCAP	5	0 - 40	10 -80 (No condensation, wet-bulb temperature 39°C or lower)	DC12
TMH-215FH01-01									Resistive	1 (multi-touch gesture possible)			
TMG-215FH03-01	325(W)x527(H)x60(D)	21.5	FullHD	89/89/89/89	350	HDMI (HDCP not supported)	USB3.0 (type-B)	None	PCAP	5	0 - 40	10 -80 (No condensation, wet-bulb temperature 39°C or lower)	DC12
TMH-215FH03-01									Resistive	1 (multi-touch gesture possible)			

CDS Service

DMC Proposes Safe and Reliable Products

Integrated Support

Support usage in severe environments by integrated support of both touch screen (hardware) and controller (software)

We offer the products supporting severe environments in terms of both hardware and software aspects by supporting touch screen and controller.

Customization

We offer various customizations

Our professional engineers support customers to meet the demands of various customizations such as panel sizes, FPC specification, adding or printing covering glass, surface finishing, and round chamfering.

Thank you
